C3.

14. Assessment strategies

Following the principle of constructive alignment, assessment on the programme is designed to evaluate how well students have achieved the learning outcomes of the programme. Assessment is located within individual modules, but the learning outcome of each module, clearly identified in the descriptor, is clearly aligned with particular programme learning outcomes.

The programmes use a mixture of formative and summative assessment on modules, and seek to maximise formative assessment as much as possible through a variety of assessment strategies. The programmesqassessments include some examinations but are largely assessed through a variety of forms of coursework, including:

- Academic Essay
- Presentation
- Research Report
- Electronic Posting
- Case Study
- Practical or creative product (in appropriate medium)
- Reflective report
- Portfolio
- Dissertation

These forms of assessment have been chosen to maximise studentsqhigh cognitive level activity. Most are the result of individual effort, but some take the form of group work.
